Profile

I am thrilled to embark on a new journey as a front-end developer. Throughout my career, I have been fortunate to explore various roles, each contributing to my growth and cultivating a unique set of skills. From my experience as a corporate trainer, graphic designer, and IT support provider, I have developed a strong foundation in communication, creativity, and problem-solving.

It was my unwavering curiosity and passion for coding that led me to pursue a Front-end development course. By transitioning to a junior front-end developer role, I aim to leverage my previous experiences and combine them with my newfound technical skills in Front-end development and UX/UI Design to create intuitive and visually appealing web applications.
